

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Use the bank of words to complete the description of the function of leaves in flowering plants.

The \_\_\_\_\_ of flowering plants have tiny \_\_\_\_\_ all over their surface. Water that has been taken in by the \_\_\_\_\_ evaporates through these pores. Plants make a substance called \_\_\_\_\_ in their leaves. This chemical is used to turn \_\_\_\_\_ and \_\_\_\_\_ into food for the plant. It also makes the leaves \_\_\_\_\_ in colour.
