

## Year 1 Project homework

### Autumn

For this homework, the children have the option to create a materials monster. In science we are learning about all different materials and their properties. The monster needs to be made from as many different materials as the children can find. Then they can create labels for each of the material used.

Due in 18.10.21

### Spring

For this homework the children have the option to create a Great Fire of London collage. This will be linked to our topic-based work 'The Great Fire of London'. The children will be given an envelope with yellow, orange and red tissue paper inside it to use to make a picture of London when the Great Fire of London happened. The children could draw, paint or sketch a picture of the Tudor Houses on Pudding Lane, then using the paper provided the children can create the flames behind.

Due in 21.03.22

### Summer 1

For this homework the children have the option to create their own alien. At this time the children will have been practising for their Phonics Screening Test, learning their phonic sounds in real words and alien words. The children can make their alien - they may want to draw, paint, or use junk material. It's entirely up to you! The children can then name and describe their alien, not forgetting to use their phonics.

Due in 06.06.22

### Summer 2

For this homework the children have the option of inventing their own plant. This homework will link to our Summer 2 science topic – plants. Each child will be given 2 pieces of paper and asked to invent their own plant and describe it. This plant could be one that you eat or one that looks attractive in the garden, it's up to you. If you choose to, you could make this invention 3D.
